

## **2<sup>ND</sup> EOSC-ESFRI WORKSHOP ON RIs AND EOSC Research Infrastructures shaping EOSC**

**Virtual meeting**  
6-7 October 2020

### **Key Messages**

- **Broad Research Infrastructures engagement is key for EOSC development, quality and sustainability.**
- **EOSC services need to offer clear added value to users.**
- **To ensure RI community needs are onboarded in EOSC, a strong voice in governance is required.**
- **RI community contributes to high quality data and can also lead the change of culture towards open science.**
- **EOSC Clusters are key building blocks for EOSC: their federation and sustainability need to be ensured for EOSC new phase.**
- **The national building blocks of thematic and horizontal infrastructures and engagement of related RPOs is vital for EOSC success.**
- **EOSC collaboration with the HPC and EuroHPC community needs to be pursued in the near future.**
- **RIs are eager to exchange experience and contribute expertise to EOSC.**
- **There is a vital need for data professionals.**
