- Aim

ENVRI mission
Share experiences and find common solutions to

- data sharing,
- accessibility,
- Interoperability

Develop joint services
Expose services to EOSC
Prepare ENVRI-hub

Objectives

Create a library of common FAIR data and

- for domains and ENVRI community
- minimum number of special clauses or
- different levels of granularity for RIs, subdomains and ENVRI community policies
- support a mutual understanding of the policies necessary for delivery of ENVRI Community Services for the EOSC

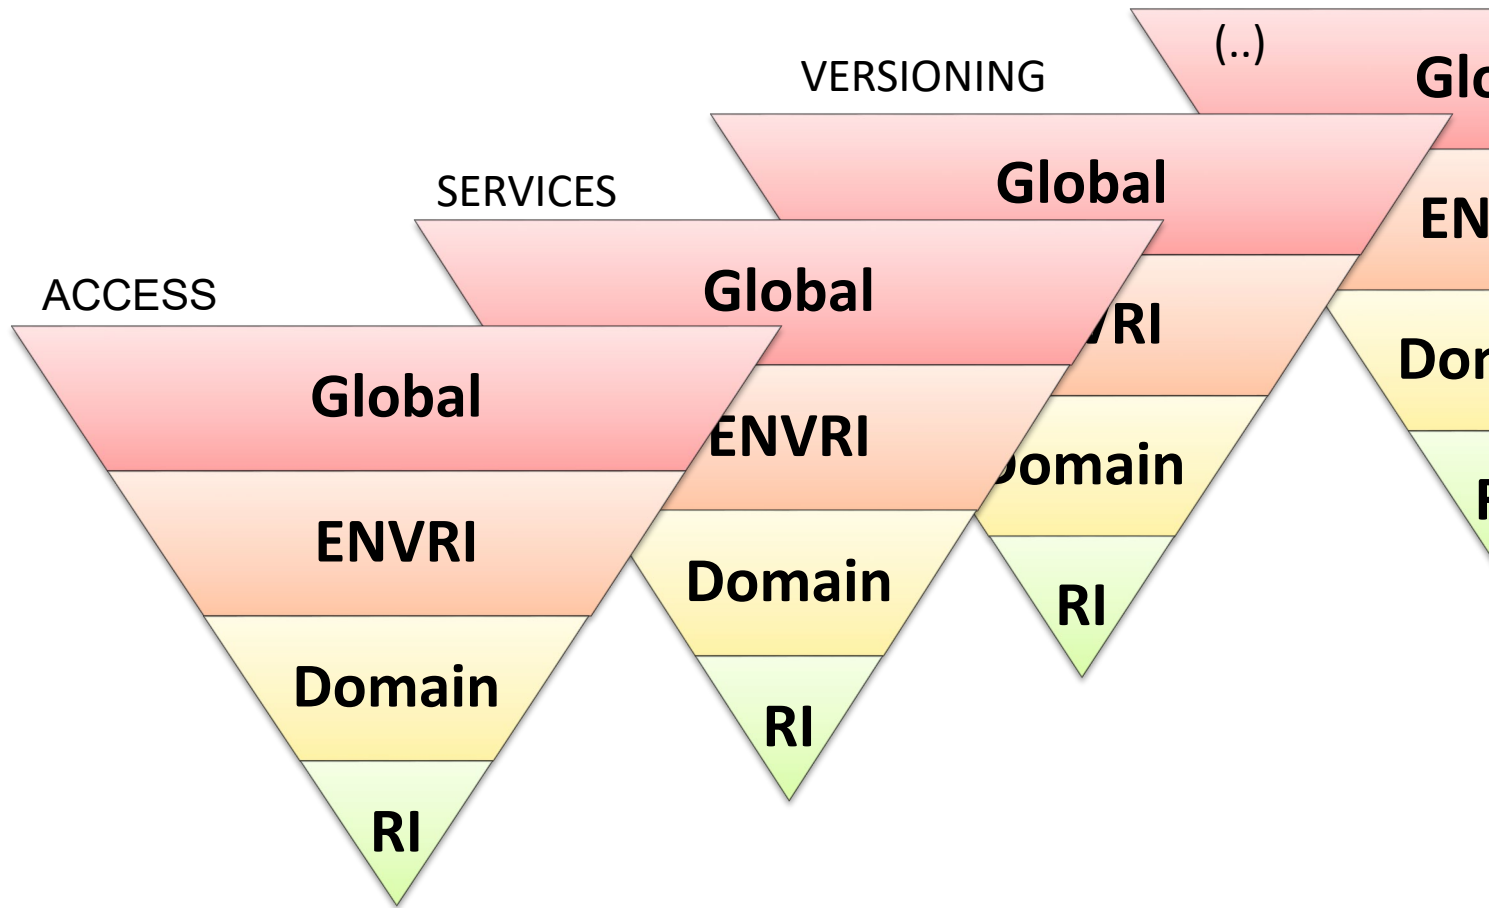

“Policy” in this context includes all aspects necessary for RI service provision i.e.

- access
- availability
- management
- authorship
- versioning
