- **European Research Area ERA** is the ambition to create a single, borderless market for research, innovation and technology across the EU
- **ERA action 1** dedicated to EOSC is the next step to:- open sharing, seamless access and reliable re-use of research outputs.
- ESFRI White Paper actions:
 - ESFRI will continue to support the development of EOSC.
 - Europe should continue to support such developments.
 - Vital need for data professionals, this should be supported.
- ESFRI's EOSC Task force 3rd meeting: What does EOSC bring to RI users?
 - EOSC is often perceived as a top down initiative
 - EOSC cluster projects are key initiatives to bring users closer to the EOSC, through its development and implementation, but also through their use cases.

- ESFRI-EOSC synergy works to everybody's advantage: for making best use of the huge expertise in these two initiatives for seizing all digital opportunities to enable a cultural shift in the way European researchers do science.
- The ESFRI RIs can act as mediators between end users and the EOSC by fostering the adoption of Open Science practices.
- The New European Research Area (ERA), plans to combine the strengths of co-creation, mobilisation, programmatic alignment and synergies at European and member state level, together with open science, skills and world-class, interconnected research infrastructures.
- ESFRI and EOSC in the ERA Policy Agenda, two main actions:
 - Action 1: 'Enable the open sharing of knowledge and the re-use of research outputs, including through the development of the European Open Science Cloud (EOSC)'
 - Action 8: 'Strengthen sustainability, accessibility and resilience of research infrastructures in the ERA'.
- The success of EOSC will largely depend on a change of culture among the researchers towards openness.
