on Research Infrastructures

# Consolidation of the Research Infrastructure landscape – how to make the most impact

---

ESFRI Workshop on the Future of Research Infrastructures in the European Research Area

6-8 November 2019, La Palma, Spain

Gelsomina Pappalardo

ESFRI Executive Board Member

# Research Infrastructure Landscape

ESFRI is a main actor for the RI landscape

- Strategic approach on Ris
- Facilitate multilateral initiatives for a better use and development of Ris
- Roadmaps
- Follow on the implementation of the RIs
- Monitoring of the RIs
- RI Landscape Analysis

## Session 2.

The landscape of Research Infrastructures is more and more mature, developed and interconnected, equipping European scientists with state-of-the-art facilities to conduct world-class research and foster innovation.

This session will discuss how to foster a more integrated, ecosystem approach in order to enable the RIs to help effectively address the common challenges that Europe is facing and which increasingly require a multidimensional approach.

# Speakers

- *Landscape of the European Research Infrastructures*

Jose Luis Martinez, Chair of ESFRI Strategy Working Group on Physical Sciences and Engineering

- *Joint activities across RIs: opportunities and challenges*

Rory Fitzgerald, Director, European Social Survey ERIC

- *Consolidation initiatives among European RIs*

Francesco Florindi, Strategy & Partnership Manager, BBMRI ERIC

# Questions

1. ESFRI role as incubator across the RI lifecycle – how can it be improved?
2. How to foster interconnections among the RIs, within a single scientific domain and across different scientific domains, for supporting interdisciplinary and multidisciplinary research for new research frontiers?
3. What relationship should ESFRI have with sectorial initiatives, international networks, other RIs not included in the ESFRI Roadmap as well as with national and regional RIs?
