

2nd ESFRI RIs - EOSC Workshop

Research Infrastructures shaping EOSC

Present & Future

6 & 7 October 2020

▶ ONLINE EVENT ◀

Break out Session 5

Title: **Cross-fertilisation between thematic horizontal projects:**

1. Thematic Clusters/RI data and tools federation and uptake – Federated e-infrastructure resources uptake

- **Access to EOSC:** Highest flexibility in EOSC access models is expected. No preference for single-point access, no restrictions expected.
- **Horizontal Services:** 1st priority AAI, 2nd priority PID
- **Commercial Services:** equal answers to all options: (No (from existing providers) (procure own services); reflecting diversity of RI needs
- **Added-value services:** FAIR data framework at cluster level but interface to EOSC is needed for using EOSC services, security coordination, cloud computing, VRE, tender and license framework, coordination of policies and decisions, visibility
- **EOSC Association:** all RI worry about the representation of stakeholders, differentiation between members and stakeholders requested
