...disambiguating three senses of knowledge (as content, as practices or procedures, and as state. Knowledge as content is the product of the exercise of basic cognitive capacities that conforms to its intended object”, Helen Longino, *Stanford*

# RESILIENCE

# RESILIENCE

My attempt is to express a conception of history in which the concept of progress would be completely displaced by that of the origin. The historical, understood in this way, can no longer be sought in the riverbed of a course of progress.

Walter Benjamin, *Gesammelte Schriften*, 6:442-43.

## Religion, politique, conflits

Dans le cadre de sa politique de paix, la Suisse accorde une attention particulière à la thématique «religions, politique et conflits». En effet, plus de 80% des personnes dans le monde s'identifient à une religion, laquelle a un impact sur de nombreux aspects de la vie personnelle, sociale et nationale.
